ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 – site conditions; paragraphs 2-3 – rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 – site information on waters of the U.S. occurring onsite): Site Conditions - Site has been historically used for crop production and contains 1 isolated wetland. There is a palustrine wetland. (6.65 acres). Aerial photography (2003), NWI data, Soils Survey (SSURGO) data, and elevation contours on USGS map were reviewed and no surface hydrological connection was found, nor were wetlands adjacent to other water of the US. No known interstate commerce connection is known to exist, and there is no reasonable potential for navigation on this wetland.
